

# LADYBIRD

You will need:

2 white paper plates, red and black paint, paintbrush, scissors, black paper, black pipe cleaner, googly eyes, glue stick, hole punch, brass fastener.

1. Paint one paper plate red and one black.
2. Once the red plate has dried, paint some black dots on it.
3. Cut out a black circle for the ladybug's head from the black paper and add some googly eyes and black antennae using pipe cleaner.
4. Glue the head to the top of your black plate.
5. Cut the red plate in half.
6. Hole punch a hole in the top corners of each half.
7. Poke a hole right through the bottom of the ladybug's head and black plate. (Try to line up the red wing to the black plate as best you can before deciding exactly where to poke the hole. Use a brass fastener to attach the two wings to the body).

Wonderful!
